

Dear Professor Cha Sungdeok,

I hope that everything is going great on your end. This letter is written to you for requesting a letter of recommendation for my application to the outgoing student exchange program of my university. I wish to go for the exchange program at Seoul National University in Korea for a semester as part of this program. I would be able to contribute to research at a laboratory of my interest in Seoul National University.

I worked with you on my UROP project of "Verification of LLM Generated Code". I am extremely thankful to you for helping me to shape up my research skills through which I could approach a problem in a comprehensive manner. Not only did it spark my interest in computer science overall and especially in AI, but it also made me interested in gaining more research experience in the international academic setting.

As far as my exchange plan is concerned, I will be looking forward to joining a lab of my choice in Korea that would enable me to work on AI. Since you have witnessed my work ethic, my ability to conduct research, and my academic achievements in UROP, I feel like I can count on you to write a recommendation letter that would help me get selected for the exchange and research component of the program.

Please know that the application deadline is 6:00 PM, August 24, 2025. If you require my CV, transcripts, or the draft of the Statement of Purpose, I would be happy to provide them.

Sincerely,

Le Trung Nghia
